

LED

JOKER

design Roberto Fiorato

h 0,5 m

A family of products suitable for outdoor installation for surface, recessed, and post top mounting. The compact size of the JOKER WALL is ideal for installations where it is not possible to recess the fittings, in both public and residential applications. The range includes wall mounted versions multi-directional light rays and coloured LED's. JOKER fittings are also suitable for halogen lamp sources. The flexibility of the range provides the designer and installer with a variety of options to meet the demands of the project from pathway lighting to accent and feature lighting in public areas.

The Joker Ray screen combined with the lenticular clear glass divides the light into four 90° angled beams. Ideal to create effects on walls, or to underline architectural details.

JOKER WALL

JOKER WALL S

	G4	max 1x10 W HSG
--	----	----------------
