KUBA

Wall luminaires

A series of indoor wall luminaires, in three different sizes, with profile in four different finishes. Kuba has a double diffuser in pressed glass, internally painted for soft, evenly distributed light.

A screen that can be used to direct the light beam up or down is available as an accessory. The stainless steel screen of the Kuba 110 model, which can also be mounted vertically, can be customized with logos or monograms upon request. Its essential geometric shape and versatility of application make Kuba ideal for common areas and hotels.

KUBA 110

Wall luminaire for halogen lamps

Wall luminaire. Wall mount in white galvanized steel.

Profile in satin finish stainless steel. Upper and lower diffusers in pressed glass

internally painted at high temperature. Stainless steel locking grub screws

Profile and diffusers are connected together with a stainless steel spring.

Available as an accessory, stainless steel screen for closing the glass for UpLight or

DownLight models if desired. Class I, IP40.

Version	Stainless steel	Socket type
QT 14 max. 60 W	006432	G9

The screen of the Kuba 110 can be customized upon request with designs, decorations, signage elements and pictograms.

Accessories (Please order separately!)

	Stainless steel
Kuba 110 screen	006437

Installation and maintenance are extremely simple. The glass diffusers are anchored to the stainless steel profile by means of retaining springs; the whole fastened to the wall plate with two lateral screws.

KUBA 200

Wall luminaire for halogen and fluorescent lamps

Wall luminaire. Wall mount in white galvanized steel.

Profile in satin finish stainless steel. Upper and lower diffusers in pressed glass

internally painted at high temperature. Stainless steel locking grub screws

Profile and diffusers are connected together with a stainless steel spring.

Available as an accessory, stainless steel screen for closing the glass for UpLight or DownLight models if desired. Class I, IP40.
